

THE BENEFITS OF ALTRA

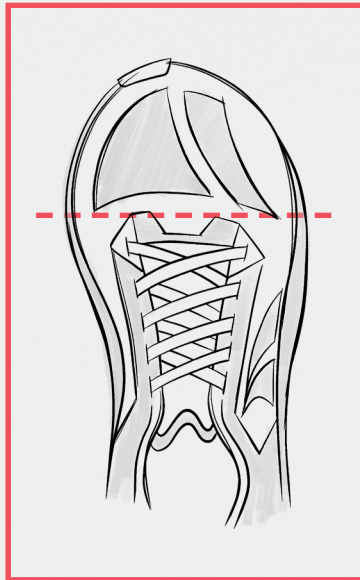

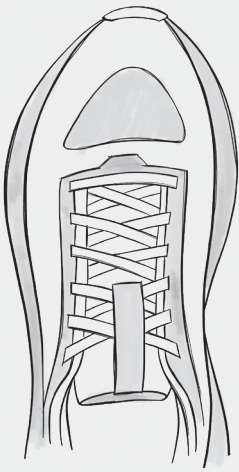

Roomy Toe Box

When you have room for your toes, they're free to move naturally.

- Room for natural toe splay helps avoid squished toes, improving comfort and balance.
- When the toes and forefoot can splay, it creates stability for your feet so you can push forward during walking and running.

Altra Toe Box

Typical Toe Box

Zero-to-Low Drop

We design our shoes this way to place your foot in a natural position.

- Balances weight distribution across the foot to alleviate excessive pressure on the forefoot.
- Encourages a more efficient, functional movement pattern.
- Low drop may be more comfortable than zero drop for those with less range of motion in the foot, ankle, or calf.
